- ④ New method: tagging
- ⑤ Conclusions and future improvements

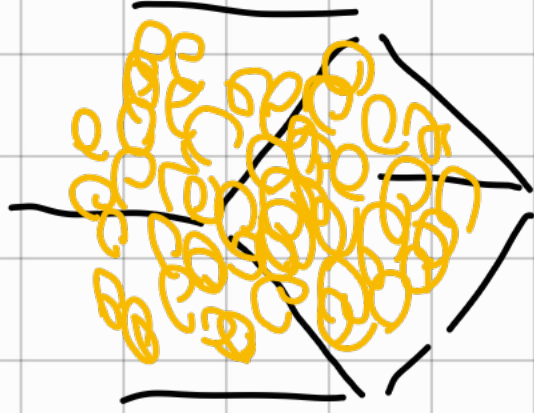

① What is DemGen: the problem

$$MCN = 5$$

$$\alpha = 0.62$$

$$\sigma = 60 \text{ kPa}$$

$$h = ? \frac{w}{m.k}$$

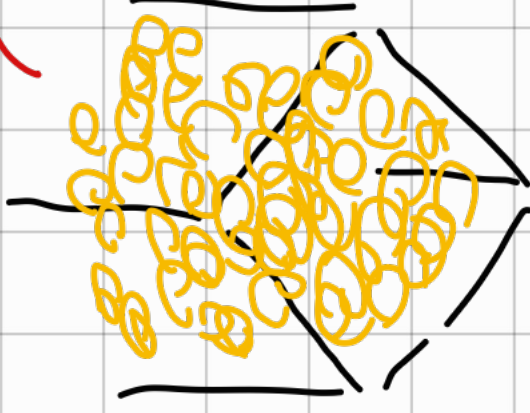

$$\rightarrow MCN = 5$$

$$\rightarrow \alpha = 0.62$$

$$\rightarrow \sigma = 50 \text{ kPa}$$

$$\rightarrow k = ? \frac{w}{m.k}$$

Two gackling with similar

microstructure variables can
behave differently
